

# Kozmic Lazer Show, LLC. - Quality Control Checklist

## Pyro & Firework Displays

Guidelines for on site

Safety Officer

### PRE SHOW:

- Set up area is free of flammable material and or gases.
  
- Set up Operator site at least 75-100' from product on 1.3 shows and a minimum of 15' on 1.4 shows.
  
- Confirm Air handlers are off.
  
- Confirm smoke detection system is bypassed.
  
- Contact building security and management to advise of show is imminent.
  
- Confer with Authority Having Jurisdiction that all is a GO for the show.
  
- Confirm shell or product spotter is in place.
  
- Confirm Fire Extinguishers are at ready standby.
  
- Fill any extra water fire fighting equipment.
  
- Show site deemed safe as possible and secure.

### POST SHOW:

- Wait 20 min to inspect Shell Mortars for 1.3 show.
  
- Carefully inspect product for any misfires.
  
- For 1.3 show carefully walk over the show site with flashlights to look for unfired shells. If shell is found alert on site safety officer and immerse in water.
  
- Continue to pick up expired product until show site is secure then rake loose papers as best possible.
